# IntuneMaps.tech
V1.0

By: Shehan Perera | MVP - Enterprise Mobility
https://linktr.ee/shehanjp

EMS ROUTE

A Microsoft Intune click-friendly Infographic created for the Windows Platform.
The goal of this project is to make sure this is a one-stop location that connects to the related Microsoft Learn pages for various Intune functions. The buttons are all clickable and will open the necessary links and from there you can navigate to Related Articles, Related Topics, Next Steps or Recommended Content sections to understand more about the features if necessary.
Feel free to open an issue in the GitHub repo on https://github.com/shehanperera85/intunemaps.tech for any suggestions, comments or issues.

Planning

- Planning Guide
- Network Endpoints
- Licensing
- Roles
- Scope Tags
- MDM Authority
- Group Policy Analytics
- Intune Suite
- Device Enrollment Managers

Device Join

- Device Registration Service
